Notes:

- (1) All three reports were from aircraft in flight.
- (2) The telex account of this report records that the observer was located at the north end of Lac Lynch (46°31'N, 74°45'W), Quebec and that the "observer saw object strike ice on lake. On investigation that the object had dropped through a hole in the ice. The hole was about five feet in diameter... The ice was about two feet in thickness. It is estimated by the observer that the object will rest in about nine feet of water at a point about 48 feet from the shore."
- (3) This event is described on cards numbered 76/6, /13, /14, /15, /16, /17, /18, /19, /21, /22 and /24. And we note that there are two cards with designation 76/6 (the first such card describing an event on February 15th).
- (4) This event has no designated number.
